Book Description

This three volume work contains full indexes for one of the key international instruments in Greek Epigraphy, the *Bulletin Épigraphique* published annually in the French language journal *Revue des Études Grecques*. The period covered is from 1987, the year the *Bulletin* began to be published again as a collective work after the death of its former editor, Louis Robert, to 2001. Following the model of Louis Robert's earlier indexes, it is structured into the following parts: publications and writers (vol. I, *Les publications*), ancient Greek words in their epigraphic context (vol. II, *Les mots grecs*), terms and subjects commented upon (vol. III, *Les mots français*).
