ISBN:	978-960-9538-62-6

### Book Description

Philhellenism, a recognized international liberal and radical ideological-political movement, a literary and art movement, nurtured in the climate of classicism and romanticism, as it has been characterized, which manifested itself in the eruption of the Greek War of Independence, did not cease to concern scholars as a complex phenomenon which has revolutionized public opinion in Europe and America in a unique way. The second edition of the literary catalog of philhellenism of Loukia Droulia, which has since become a reference book for those involved in this issue, was considered imperative because of the new titles identified in about 40 years since the first edition of 1974. Additions, amounting to 1087, i. e. 1/3 out of a total of 3172 entries, were incorporated into the project undergoing a homogenization process so as not to completely remove the first edition. At the same time, the treatment was extended to the old entries in order to supplement them with new data that emerged from the research.
